

## More in the Bank, Less from the Environment™ A Teacher Workshop on Consumer Conservation Curriculum

Thursday, February 25th, 2010  
OKC Zoo & Botanical Gardens, 2101 NE 50th OKC, OK  
9am-3:30pm \*Registration 8:30 - 9am

A Nurtured World Inc., a non-profit education organization, is funded by the US EPA to train Oklahoma teachers on a "Consumer Conservation" curriculum that is correlated to Oklahoma State Standards for 6th – 8th grade science, math, and English language arts.

The curriculum teaches students about their personal behavior and the environment. It is completely transferable to other age groups and has been taught throughout the US to children, teenagers, and adults, who on average are saving \$2,000 and reducing 2.1 tons of CO2 per year.

Attendees will receive a Teacher Guide, Student Guide, six lesson curricula on CD-ROM (includes optional Power Point slides), and Action Bags that can be used in the classroom to teach the curricula, reduce environmental impacts, and save money. The Guides contain reading passages for the students, discussion questions for classroom use, activities for the students including math, science, and English activities, and evaluation instruments for each lesson.

<b>L E S S O N S</b>	Lesson 1 – Consumer versus Industrial Environmental Impacts	<b>C O M M E N T S</b>	“The course changed my life. I wish every teacher could go through this course.”
	Lesson 2 – Values and the Environment		“Best in-service I’ve ever taken. Coverage of physical and chemical changes is best I’ve ever seen.”
	Lesson 3 – Money and the Environment		“Great lessons, I can start these lessons right away.”
	Lesson 4 – How The Earth Works and How You Affect the Earth		“Wonderful real world personal applications for a variety of ages.”
	Lesson 5 – How to Create Change		
	Lesson 6 – Actions You Can Take		

Elizabeth Frisch is the Director of Development for A Nurtured World, a not-for-profit dedicated to a global change in the way people think about their environmental impact so they can lead environmentally sustainable, financially successful and satisfying lives. An entertaining speaker who openly shares the struggle of living the 'green' life, Elizabeth has delivered this workshop to audiences nationwide. Elizabeth is a 'recovering' chemical engineer with a degree from Purdue University. She has 20 years of experience in project management, auditing, training, program development, and facilitation with 50+ industries, local/state/federal government, schools, military bases, and citizens across the U.S.
