

OK STEM Centers is developing a statewide network of Science, Technology, Engineering, and Math (STEM) Master Teachers (MTs) dedicated to providing local, high quality professional development for PreK-12 teachers with the goal of improving student achievement in STEM.

OK STEM Centers is looking for a few good Master Teachers...

- OK STEM Master Teachers must be currently teaching in an Oklahoma school.
- They will be selected for regional representation in both rural and urban schools.
- They must commit to participating in extensive training with the goal of providing local, high quality training for teachers of STEM.

In addition to providing for high quality STEM professional development, OK STEM Master Teachers will work collaboratively and as a network with educators to develop lesson plans for a statewide STEM Teacher Website that supports the OAS standards.

OK STEM Centers activities will be held in collaboration with Career Tech Centers/regional universities where resident content experts can be a resource for each Master Teacher. Master Teachers will be required to attend monthly training at the University of Central Oklahoma, do online content modules provided by the National Science Teachers Association, and work at least 2 afternoons a week with other their regional partners and/or other teachers. They are encouraged to conduct at least one weekend training a month and will be required to conduct a summer professional development institute.

Minimum Requirements:

- **Current K-6 teacher and/or 6-12 Science, Technology, Engineering, or Mathematics Teacher**
- **Masters Degree and/or National Board Certification Preferred**
- **Demonstrated experience and/or interest in being a teacher leader**

Participants will receive an \$800.00/month stipend during the school year and a \$1500/month stipend in June and July.
